# New Recruits

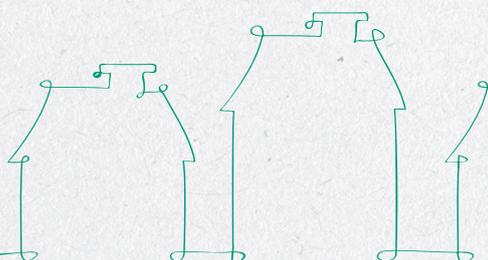

Get your pupils learning outside the classroom, working together, investigating and exploring, in the Greater Manchester Fire & Rescue Service training and safety centre.

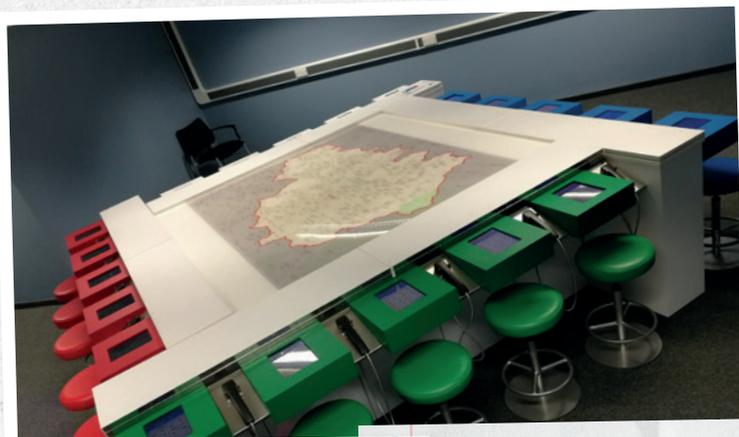

The visitor journey will take your learners through the eyes of a firefighter. Taking on the role of Greater Manchester Fire & Rescue Service recruits the participants will experience a 999 control centre, respond to a road traffic collision, carry out a safe and well check, learn about the recovery position for an unresponsive casualty, investigate fires and many more exciting activities!

Our teacher and learner resources are designed to reinforce key safety messages whilst working towards National Curriculum outcomes. The visit and resources are designed to encourage learners' current and future moral, cultural, mental and physical development. At Greater Manchester Fire & Rescue Service we aim to prepare all learners for the opportunities, responsibilities and experiences of later life, promoting the development of knowledge, understanding and skills they need to be educated citizens. We're working on education resources to enhance school group visits and support class room activities.

Our educational packages are based around the current fire service recruitment process. Currently within the fire service the new recruits will have volunteered in some way with Greater Manchester Fire & Rescue Service to demonstrate their commitment prior to becoming a firefighter.

## New recruits

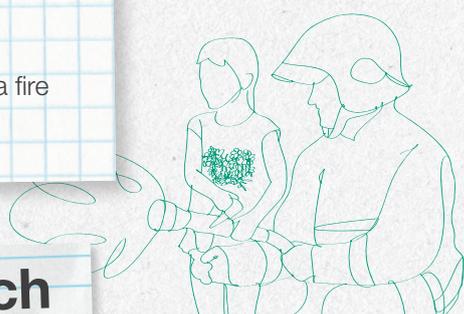

The key stage 2 learners will feel part of the fire service and what it's like to become a new recruit. This educational package offers an insight into what the fire service does and also delivers key safety messages on a visit that could save your life.

### The new recruits will;

- Listen to an emergency call in our control room and learn about the consequences of hoax calls
- Spot fire hazards and dangers in the home and learn when to test your fire alarm
- See the effects and consequences of a fire
- Learn the science behind a fire

## Role of the new recruit

- Recognise the importance of effective communication
- Identify and demonstrate what number to call in an emergency
- Practice escape plans
- Recognise if someone is unresponsive and not breathing

## CASE STUDY

## Bury Grammar School Girls

Having easily arranged our free trip via the internet, our Year 6 classes visited the Greater Manchester Fire & Rescue Service training and safety centre in October 2017.

This was arranged to coincide with both our guidance and science lessons, it also promoted links with the local community.

It is fair to say that we were amazed by what the day had in store for us. The whole centre is incredible and there were many 'wow' moments, from the immersive theatre to the house fire recreation. Everything is well related to this age range and the children were totally absorbed. We met some of the Firefighters there doing training and the centre staff were welcoming and friendly. The children learned such a lot from their visit, I wouldn't hesitate to recommend this site to others.

Mrs K Woodhead,  
Junior Teacher
